

Welcome to the Future of Medical Imaging.

dicomray

Simple. Easy. Reliable.

- ✓ Simple design
- ✓ Easy to use
- ✓ Reliable
- ✓ Quick
- ✓ Affordable
- ✓ Upgradable

Today's Radiology departments require a fast, reliable and easy to operate CD/DVD Recording Solution that doesn't cost a fortune to maintain. As PACS Administrators continually look for new ways to reduce cost and increase workflow efficiencies, advanced technology becomes essential. The dicomray product line offers many unique solutions to meet your individual site requirements.

Available Solutions

mantaray

autoray

mammaray

cathray

Introduced in 2006, the dicomray line has evolved into a complete suite of CD/DVD burning applications. Starting with the deskray for entry-level MS Windows XP desktop users. This intuitive graphical user interface produces DICOM Part 10 compliant CDs & DVDs from any workstation or PC connected to PACS or individual modalities. Your staff will love this simple and powerful tool to further reduce expensive film production of patient images.

CDs will not only reduce the cost of film processing and storage, but allow greater flexibility with image manipulation from any DICOM viewer your prefer on each CD/DVD.

In addition, we now offer custom pre-printed Same Day Labs Medical Grade Media for a professional look – which is far better than using a Sharpie™.
